

Junyan Lu

Product & Experience Designer

Complex workflows, internal tools and AI-enhanced products

iamjunyan.lu@gmail.com · +86 187 9072 6607 · Portfolio · LinkedIn · Shanghai / Milan

Product and experience designer with a background in industrial design and product-service systems. I turn research on complex workflows into product opportunities, then validate internal tools and AI-enhanced products through rapid prototypes and testing.

EXPERIENCE

Product & Experience Designer — Segway-Ninebot, Design & Brand Center

May 2026 – Present

- AI Zhihui — internal AI workflow turning administrative event briefs into reviewable, on-brand materials.
- Shaped requirements with design, research and business stakeholders; used AI-assisted prototypes to reach pre-launch validation.
- Defined the human–AI split: the model proposes copy and visuals, controlled templates guard date, venue and brand marks.
- Built the full-stack demo with AI assistance; ~10 min per poster against a ~60 min baseline (initial measurement).

UX & Product Design Intern — DI Works, Milan, Italy

Feb 2025 – Jul 2025

- YouFeed 0-to-1: owned the frontstage mobile experience across touchpoint entry, voice/text input, transcript review and critical edge states.
- Deployments captured 1,000+ project responses at ISH Frankfurt and with Giacomini — a team metric, not independent ownership of backend analysis.
- Luxury NFC / Digital Product Passport: designed the core mobile WebApp flow connecting physical tags to digital content.

UX Research Intern — Bosch Power Tools, Shanghai, China

Dec 2022 – Jul 2023

- 20+ interviews on workers' career development; built five personas, journeys, opportunity areas and MVP concepts.

User Research Intern — Temimu Incubator, Shanghai, China

Jun 2022 – Sep 2022

- Desk research, 10+ depth interviews and two focus groups with urban adults aged 23–35, turned into market opportunities.

SELECTED PROJECTS

Sound Mirror — independent live product · concept, interaction, visual design & build

2026

Eight A/B music choices become an explainable taste portrait: deterministic scoring, AI-enhanced language, graceful fallback and exhaustive checks of 256 rule combinations. sound-mirror-app.vercel.app

Caffeine Check — independent Live Lab · product definition, flow, MVP scope & build

2026

A lightweight caffeine-intake tool; longitudinal use, rule boundaries and health-context messaging remain unvalidated. jackbo9.github.io/caffeine-check

EDUCATION

Politecnico di Milano — MSc, Product-Service System Design

Sep 2023 – Dec 2025

110/110 · Thesis: application and evaluation of AI tools in design workflows.

Tongji University — Bachelor's in Industrial Design

Sep 2019 – Jun 2023
