WORK EXPERIENCE

Product & Experience Designer — Segway-Ninebot, AI design group

May 2026 – Present

- AI Zhihui — internal AI workflow turning administrative event briefs into reviewable, on-brand materials.
- Reshaped the brief, brand rules and templates into a staged flow: confirm copy, choose a key visual, compose and export.
- Defined the human–AI split: the model proposes copy and visuals, controlled templates guard date, venue and brand marks.
- Specified output checks that separate trial warnings from strict failures, and recovery that preserves confirmed copy.
- Built the full-stack demo with AI assistance; ~10 min per poster against a ~60 min baseline (initial measurement).

UX & Product Design Intern — DI Works, Milan, Italy

Feb 2025 – Jul 2025

- YouFeed (AI feedback product): led scenario exploration, interaction design and frontstage prototyping.
- Extended the product into exhibition, retail and product-lab scenarios, redesigning key pages and flows.
- Supported real-world validation with client Giacomini at an exhibition; 1,000+ pieces of user feedback collected.
- Luxury NFC / Digital Product Passport: structured the mobile web flow and investigated NFC placement and scanning.

UX Design Intern — Bosch Power Tools, Shanghai, China

Dec 2022 – Jul 2023

- Ran 20+ interviews across career stages; turned five personas and journey maps into an MVP concept and roadmap.

User Research Intern — Temimu Incubator, Shanghai, China

Jun 2022 – Sep 2022

- Trend research on urban adults aged 23–35: 10+ interviews and 2 focus groups turned into strategy.

EDUCATION

Politecnico di Milano — School of Design

Sep 2023 – Dec 2025

MSc in Product Service System Design · final grade 110/110. Thesis on evaluating AI tools in design workflows.

Tongji University — College of Design and Innovation

Sep 2019 – Jun 2023

Bachelor of Industrial Design.

PROJECTS

Caffeine Check — live utility, independent

2026

A live caffeine-intake tool for one everyday decision: users, flow, MVP scope and intake logic. jackbo9.github.io/caffeine-check

Sound Mirror — live concept validation, independent

2026

Eight choices become an explainable music portrait; deterministic scoring is separated from AI-written expression. sound-mirror-app.vercel.app

SKILLS

Languages

English (IELTS 7.0, working proficiency) · Italian (conversational) · Chinese (native)

Design

user research · interaction design · information architecture · service design · prototyping

AI

AI workflow design · prompt design · deterministic-vs-generative framing · AI-assisted build
