

JUNYAN LU

UX RESEARCH & PRODUCT DISCOVERY | EVIDENCE TO DIRECTION, STRUCTURE, PROTOTYPE

iamjunyan.lu@gmail.com | +86 187 9072 6607 | Portfolio | LinkedIn | Shanghai / Milan

UX researcher and product discovery designer with industrial-design and product-service-system training. I turn interviews, contextual evidence, and complex service relationships into product opportunities, priorities, information architecture, and testable prototypes.

EXPERIENCE

Segway-Ninebot | User Experience Research

May 2026 - Present

Design & Brand Center / Frontier Design

- Embedded in business-unit studies, designing research materials, analyzing priority data, and synthesizing reports and internal readouts that help design teams identify user problems and opportunities.
- Contributed to internal-workspace platform exploration by framing usage scenarios and using rapid prototypes to clarify requirements and prepare later user testing and iteration.

DI Works | UX & Product Design Intern

Feb 2025 - Jul 2025

Milan, Italy

- Owned YouFeed's frontstage mobile experience across object-bound entry, voice/text capture, transcript review, and edge states shaped by noise, permissions, weak networks, and short attention.
- Deployments captured 1,000+ project responses; this is a team outcome and does not imply independent ownership of the backend insight model or complete data analysis.

Bosch Power Tools | UX Research Intern

Dec 2022 - Jul 2023

Shanghai, China

- Conducted 20+ interviews and built five personas, translating career-stage differences into opportunity areas, MVP concepts, and product-roadmap direction.

Temimu Incubator | User Research Intern

Jun 2022 - Sep 2022

Shanghai, China

- Combined desk research, 10+ depth interviews, and two focus groups to translate urban-user evidence into market opportunities and strategic recommendations.

SELECTED CASES

YouFeed | Real-world Feedback System

2025

Frontstage mobile experience design & implementation

- Connected object context, NFC/QR touchpoints, voice/text input, and reviewable transcripts into one field flow while making backend and personal ownership boundaries explicit.

Promap + UniPlus | Research & Systems Dossier

2022-2024

Research to direction / service structure to IA

- Used interview evidence to shape a career-stage strategy, then mapped roles, lifecycle, and permissions into platform modules and workflows; outcomes are directions and prototypes, not deployment metrics.

EDUCATION

Politecnico di Milano | MSc, Product-Service System Design

Sep 2023 - Dec 2025 | 110/110 | Thesis: application and evaluation of AI tools in design workflows.

Tongji University | Bachelor's in Industrial Design

Sep 2019 - Jun 2023 | College of Design and Innovation.

SKILLS & LANGUAGES

Research & product Research design, interviews, contextual research, analysis, product discovery, service design, IA, usability testing

Prototyping & tools Figma, rapid prototyping, AI-assisted front-end prototypes, research synthesis, workshops

Languages Chinese (native); English (IELTS 7, working proficiency); Italian (conversational)
